

Security level: CLASSIFIED
Sloppery

Operation: Slippery

Active Agents: Spyology Squad
Mission Start Date: Immediate

Background Info: Dr. Stinky Breath and the purple ninjas have figured out a way to control our friction with some kind of laser. We need you to research the friction near you to see if their laser has ruined the friction in your area.

Assignment: Friction Investigation

Phase 1: Find 5 different types of surfaces with friction. (Ex. a wood floor, driveway, sandpaper, etc). Before touching them, rate their friction level on a scale of 1-5.

Phase 2: Now test them. Rub your hand across the surface. Were your ratings correct? Would you make any changes? Are there any surprises in your findings that may be the result of Dr. Stinkybreaths laser?

Phase 3: Find the most slippery surface and see how far you can slide with your socks on. Is there something more slippery than socks that can help you slide further?

Report all your findings back to HQ.

We are counting on you, Agent.

Mr. Jim
Spyology Squad Director
